Press Release

VIVID IP Launches LogiSIP a Partnership

San Diego, CA, October 2007: VIVID IP is proud to launch LogiSIP in partnership with Carrier Support Group. This partnership allows VIVID IP's small and medium sized business to purchase SIP trunks one at a time, compared with other solutions that must be purchased in increments of 23 or 24 channels. Combine that with flat rated pricing for domestic long distance and you can show dramatic cost savings making IP transport and SIP trunks increasingly popular. VIVID IP provides business VoIP and hosted PBX solutions for small or home offices up to 4 phones and business VoIP for 5 to 100+ phones. Carrier Support Group specializes in working with many major telecommunications companies offering small and medium sized businesses variety of major Internet (IP) Service Providers and Telecommunications Carriers.

VIVID IP is Southern California's leading source for business-class IP-phone solutions, including equipment, cabling, installation, and support. VIVID IP's experts can help you design, implement, and maintain a reliable and cost-effective communications network by offering complete and proven solutions for single- or multi-site businesses including remote-user environments.
